

RAIN Token Deep-Dive: On-Chain data & Evidence

On-Chain Evidence & Footnotes:

To maintain full transparency, the specific structural links between the **RAIN**, **TOMI**, and **DOP** deployer networks are mapped via the following public ledger interactions:

- **[1] Shared Destination Cluster (0xbac1):** On October 14, 2025, two separate entities sent dust transactions to the exact same destination address (0xbac19cb634c34baf7670263ccc74806a2d004fb0) within 36 seconds of each other:
 - At **3:31:11 PM UTC**, wallet 0xa810e14e2ee46e1e25e56bcf280208b78242d5d1 (linked to the **TOMI team multisig** and CEX deposit 0x6a6) executed its transfer.
 - At **3:31:47 PM UTC**, wallet 0xa35e61cb836ae15f2d7d400efb49bda7222b98bc (linked directly to the **RAIN deployer**) executed its transfer.
- **[2] Second-Degree DOP Links:** The destination wallet 0xbac1 later received funding in December 2025 from wallet 0xf205, which was directly funded by an official **DOP multisig** address.
- **[3] Shared Centralized Exchange Routing:** In February 2025, the TOMI-linked wallet 0xa81 transferred assets to 0x2db0e5d3678ace8db1c400844b2ed9a0af331a66, which subsequently routed funds into the exact same Centralized Exchange deposit account utilized by **DOP Deployer 0x366**.
